Weather Even a British Car Could Love

November 22, 2004

A little foul weather can't keep us down. It was just like home for the autos involved.

Fifteen hardy EMC supporters attended our final and very successful Tech Session IV last Saturday, November 20th at the crossroads of EMC'dom in Eddiceton, Mississippi. We had a great turn out and are sorry that other members weren't able to attend the last gathering of the mechanical wizards and their lovely wife's for 2004.

But don't worry there'll be plenty of opportunity to reunite in coming months and if your really up to having these lovers of British Iron descend on your project just give us a call or an e-mail and we'll arrange to assist.

For Tech Session IV Jake Weaver brought over the head from his TR6 project and we pulled the valves examined the seats and reached various hypothesis as to why number 5 cylinder was slightly down on compression. Since Jake has indicated he wanted a bump in the HP area with a head surfacing we decided to forward the bits on to the machine shop and let them do the final cleaning, surfacing and assembly.

Pat Cashman brought us two projects. First was his TR3 and it's fits, kicks and generally disagreeable SU's. After everyone concluded that the spark plugs really.. really... really were not in question, Jim and Pat after playing with not one but two Color Tunes got the TR3 purring like a kitten. Then Pat, in proper British style donned his yellow mack and took that car down the road....of course with the top down....it was only a drizzle we all heard him say on his return with water on both sides of the windshield. Pat's second project was a tire change on the trailer and the loading of the TR3 to get it home before the weather got really bad.

Our yearend Christmas party went off on Saturday December 4, 2004 at the garage of Pat and Barbara Cashman's in Vicksburg MS. A great turn out with lots of good food. Everyone poked around at the collection of automobiles including Pat's recent purchase an early '60's cruiser...can you say BIG CADDY. Past EMC president Al Adams took to the streets with the yacht and even managed to maneuver it back into it's berth without hitting a single buoy.

We had a brief meeting during which work started on the calendar to be posted on our web site www.msemc.org shortly.

The steering committee is hard at work on sprucing things up for 2005. Hope that everyone that had the opportunity to gather with us in 2004 will return in 2005 for even more fun and excitement.

Hope to see you on the road in '05!
